---

Just so someone at EPA other than me knows, I sent this attached 4/3/08 message to ACE and earlier left a phone message with Rudd prior to sending out my "finalized summary notes" message last Friday.

Fw: 3rd draft Columbia River TMDL Meeting Summary

David and Rudd,

Can I assume you are okay with finalizing our meeting summary notes? I got an all-clear from Reclamation. Thanks

3rd draft Columbia River TMDL Meeting Summary

Hello,

And where are we? Well the Technical Committee met (yea!), but we still need to finalize our meeting summary (boo). I let up on this task, but am now seeking to draw it to a close. I've attached a new draft of the Meeting Summary for your review and concurrence. On the last draft, I received comments from only Bryan Horsburgh and Rudd Turner. I incorporated their changes, which included dropping some highlighted language that was meant to be explanatory and adding a note to explain the timing status of the meetings of the technical and policy committees. Rudd also asked for some dialogue on the committee structure because I took some post-meeting license to create a management committee. Because of the difficulty in orchestrating a dialogue on the committee structure and in order to finalize the notes, I have removed the committee participant lists as an attachment to the notes. The committee lists still exist for us all to reference (attached) and we can sort this matter out if need be when we next meet.

Hopefully, these last changes will allow us to finalize the summary. If the Corps and Reclamation could each let me know that you concur with this summary, I will distribute it final. Thanks much.

Dave Croxton (206) 553-6694
